Today's Focus: CSS Flexbox Layout
Day 14 • 4 tasks
Task Implementation Steps
Redesign the notes page so that each note appears as a card in a responsive Flexbox grid.
1 Wrap each note <li> in a element.
2 Set the parent container to display: flex; flex-wrap: wrap; with gap.
3 Define card width (e.g., 300px) and add padding, border, and shadow.
4 Add media query to stack cards on narrow screens.
